

HM/P High-Pressure Anti Wear Hydraulic Oil

【Performance Features 】

- Transcendent extreme pressure anti wear property, slows down the worn-rate of equipments, and effectively extends the operating life of pumps and systems.
- Outstanding thermal & oxidation stabilities, slow down the rate of decay, extend oil-draining intervals.
- Good anti-foam properties and air-release characters, to ensure the static pressure energy can be transmitted through systems sensitively, accurately and smoothly.
- Good performances of demulsification and filtration, it can rapidly fractionate the moisture mixing into the oil, maximally reduce the possibility of filter plugging, confirm the function performance of lubrication.
- Favorable applicability to all sorts of general sealing material.
- Quality performances meet the specification requirements of PetroChina Q/SY RH20432001, USA Denison HF-0 and Vickers M-2950-S, I-286-S, Cincinnati Milacron P68/P70/P69, German DIN 51524 (II), French AFNOR NF E48-603 (HM)
